

PPU

This image shows a micrograph of a neuromorphic chip. The central processing unit (PPU) is highlighted with an orange border. Below the PPU, there is a stack of three rectangular regions: CADC (blue border), Synapses (red border), and Neurons (green border). The chip features a grid of green and blue lines forming a mesh pattern. Numerous black wires are visible along the edges, and several circular pads are located at the corners.
